

## Software Testing Lab

The objective of this lab is to facilitate the students in order to learn the fundamentals and advanced concepts in software engineering and software testing. The lab consists of 15 computer systems which are equipped with several softwares like MATLAB and Python. The lab is dedicated to provide facilities for research scholars, undergraduate and postgraduate students to simulate their major and minor projects in software engineering, software testing, optimization and their applications, wireless sensor network, and machine learning, etc. It also facilitates various summer training programs to the students of different institutions.

### Lab Resources:

Hardware configuration	15 CPU with Intel (R) Core (TM) i7-4770 CPU @ 3.40 GHZ, 12 GB RAM, 500 GB Hard Disk
Operating Systems	Ubuntu 16.04
Softwares	MATLAB, Python
Other resources	Printer, white boards and High Speed Internet

**OC of the Lab:** Dr. Anoj Kumar
